

MATH 591
NUMBER THEORY SEMINAR
COURSE POLICY

Requirements for 1 credit hour (not on program of study):

register pass/non-pass

attend all talks

Requirements for 3 credit hours (not on program of study):

register for standard grading

attend all talks

present a 50 minute talk on a pre-approved topic

Requirements for 3 credit hours (on program of study):

register for standard grading

attend all talks

present two 50 minute talks (or a two-part talk) on a pre-approved topic(s)

In the event that the number of students enrolled exceeds the number of time slots on the calendar, the speaking requirement may be replaced by an original expository paper, which results from in-depth reading on one of the topics presented during the seminar, and contains material gleaned from multiple sources. Those registered for credit on their programs of study who take this option will be expected to submit a more comprehensive paper. The expository paper will not be an option unless the calendar fills completely.
